Dear Aaron,

This letter is embarrassingly late but I'm committed to sending it nonetheless.

Several years ago you were kind enough to mail replacement charcoal to me without cost in exchange for my testimonial, which I still am only too happy to provide. (In the meantime, between here and there many changes for us were to follow.)

"I can't overstate my praise for the Odor Hog! That hot summer first week in our new home made us suspicious of why the Sellers demanded their funds from the title company before closing: every morning and into the evenings, our outdoors was perfumed with wafts of sewer gas. The unpredictable stench kept us from using our back patios and yard year-round. One plumber suggested "maybe extending the vent pipes higher" above the adjoining roofs. (That did not work!)

We learned this is a common septic problem and in the process, stumbled onto the Odor Hog website. Skeptical, but with all fingers crossed we placed our order. Immediately upon that very simple installation three years ago, we were free of absolutely *all* sewer gas odors around our home morning and night, through our Montana summers and winters. There are occasional times outdoors that we still say an out-loud thanks to our Odor Hogs and know you will too!"

Our best wishes to you for the continued growth and success of your company and your fabulous products.

Very truly yours,

Kristin Marshall
